Public Spaces Straight Edge

Hedge is ideal for outdoor public spaces. It's rusting appearance provides a natural earth tone to any landscape project.

- Garden borders
- Tree surrounds
- Paths

A woman in a dark dress and sandals is sitting on a modern, dark-colored bench. She is looking towards a cityscape in the background, which includes a body of water and several buildings. The foreground is filled with lush green plants and a paved path. A sign in the bottom left corner reads "PROTECT THE PLANTS STAY ON THE PATH".

Finishes

Straight Edge

Galvanised

Galvanising is the process of applying a protective zinc coating to steel or iron, to prevent rusting. The most common method is hot-dip galvanising, in which the parts are submerged in a bath of hot, molten zinc.

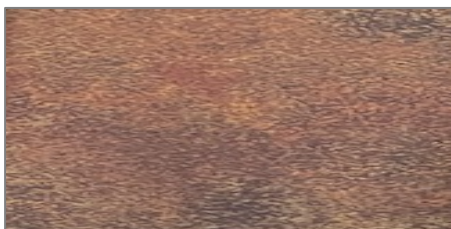

Galvanised

Weathered Steel

Weathering steel, often referred to by the generalised trademark COR-TEN steel and sometimes written without the hyphen as corten steel, is a group of steel alloys which were developed to eliminate the need for painting, and form a stable rust-like appearance after several years' exposure to weather
